You see that mobile phones can cause health problems to young people and they are really dangerous. But at the same time there are a lot of benefits in using them. What are they?</p> <p>The first advantage that you have written is the possibility to surf the Internet. Do you spend much time surfing the Internet? Do you think the Internet can be dangerous? Why? Of course, people who spend too much time surfing the Internet can also have problems.</p> <p>Now I want you to listen to the story about a person's attitude to the Internet. Listen to the text and try to understand how to answer the following questions: Group 1 – What does the speaker do with the help of the Internet? Group 2 – What problems does the speaker have because of the Internet? Group 3 – What thing doesn't the speaker like about the Internet? Be attentive, you will hear the text only once. Now, let's check up. Answer your questions, please. I see that you are a little tired. Would you like to play? Let's play and move a little. Internet

I think the Internet is the greatest invention ever. Think how it has changed the world. So much information is out there. It has totally changed my life.

I can chat with friends, download music, buy books and get all the information I need for my homework. It took days or weeks to do any of these things before the Internet.

I spend hours every day online. I think I spend a little too long. I'm sure staring at a computer screen all day isn't good for my eyes. I think it's also making me fat. I need to exercise a little more.

The only thing I don't like about the Internet is that it can be dangerous. I don't really like putting my personal information online, especially on social networking sites like Facebook.
